Brain and Sensory Foundations

ONLINE TRAINING COURSE

For OTs, PTs, OTAs, PTAs, SLPs, Parents, VTs, Counselors, Educators and Social Workers

Open Enrollment: Sept 1 to Oct 31, 2016

1.6 AOTA CEUs*

Neurodevelopmental Movement for Developing Physical, Emotional, Social and Learning Skills

This online course requires internet access.

TIME + DATES: Open Enrollment Sept. 1st to October 31st, 2016
Course recordings accessible through Jan 31, 2017

TUITION: $369

Adding neurodevelopmental movements to your practice is beneficial for all clients and can be particularly valuable when working with individuals of all ages who experience challenges with:

ADD/ADHD	Autism	Coordination Challenges
Developmental Delay	Sleep Difficulties	Learning and Speech Delay
Cerebral Palsy	Sensory-Processing Issues	Anxiety/Depression
Selective Mutism	Low Muscle tone, Poor Posture	Help w/ Balance & Gait
Stroke/TBI	Handwriting Difficulties	Parkinson's

You will learn:

- Skills to integrate key reflex patterns and the neuro-sensory-motor system.
- Movements that release stress, anxiety and trauma and lay a foundation for physical and emotional health.
- Movements that increase focus, concentration, coordination, organization, confidence, strength and stamina.

All the movements we learn in *Brain and Sensory Foundations* should feel enjoyable and comfortable. By registering for this online course you agree to take responsibility for your own well-being; you should adapt or refrain from doing any movement that is uncomfortable and check with your healthcare provider if required prior to beginning a movement program. **View course FAQs, assignment instructions, and policies on our website, www.moveplaythrive.com/training-events**

Improve a child's future with 15 minutes a day of these life-changing movements.

"**I would highly recommend your course to parents, teachers and therapists.**"
—K. Rupp, Occupational Therapist

"Our four-year-old was falling and hurting himself two or three times a day. After a month of doing the movements, he does not hurt himself anymore…**He is calmer and falls asleep more easily.**"
—I. F., Parent

"I would not have believed the effectiveness of these movements without actually witnessing the changes in our son…**We are joyfully amazed.**"
—Beth D., Boise, Idaho

"Two months after we started doing neurodevelopmental movement, **our son jumped four grade levels in math and two in reading**."
—Laura P., Homeschooling Parent

"[My client] has already made great gains with balance, coordination, sensory processing, impulse control, and frustration tolerance and it has only been 6 weeks. Amazing!!"
—H. S., Occupational Therapist, North Carolina

"I have found that working with the early reflexes…can have a **profound and lasting effect on all academic learning and overall coordinated movement**."
—Steven Kane, Occupational Therapist

"During my 30 years as a Pediatric Physical Therapist, I have seldom been impressed to write a review. I have applied these tools in my practice and all of my clients have benefitted to a significant degree. **I highly recommend *Brain and Sensory Foundations.***"
—Melody Edwards, Physical Therapist
